# VISITING PROFESSORSHIP PROGRAMME

within the ESR Support Initiative

## BALKAN CONGRESS OF RADIOLOGY UROGENITAL RADIOLOGY

October 4, 2018  
Kuşadası/Turkey

### Course information

The course is aimed at senior residents, board-certified radiologists and fellows interested in urogenital radiology. It is designed as an intense one-day programme, directly linked to the Balkan Congress of Radiology, as part of the ESR Support Initiative. A practical focus will be on the most important clinical questions, which need to be answered by optimised imaging strategies for patients with haematuria, focal renal lesions, testicular tumours, or prostate, cervical and ovarian neoplasms. Renowned European experts will ensure a high-quality teaching programme, combining lectures and interactive case-based discussions.

### Learning objectives

- to appreciate the potential of advanced imaging in the clinical management of patients with haematuria
- to review state-of-the-art imaging strategies and criteria in differentiating focal renal lesions
- to present an update on multiparametric imaging of prostate
- to discuss the current role of imaging in the initial detection, characterisation, staging and follow-up of testicular tumours, cervical and ovarian cancer

# Programme

## BALKAN CONGRESS OF RADIOLOGY UROGENITAL RADIOLOGY

October 4, 2018  
Kuşadası/Turkey

### Thursday, October 4, 2018

08:00–08:45	Registration
08:45–09:00	Welcome and introduction
09:00–09:30	<b>Imaging of haematuria</b> L. Derchi, Genoa/IT
09:30–10:00	<b>Differential diagnosis of focal renal lesions</b> J. Futterer, Nijmegen/NL
10:00–10:30	<b>Cervical cancer: initial detection and depiction of recurrence</b> A. Rockall, London/UK
10:30–10:50	Coffee break
10:50–13:00	<b>Workshops</b> (L. Derchi, J. Futterer, A. Rockall)
13:00–14:00	Lunch break
14:00–14:30	<b>Imaging testicular tumours</b> L. Derchi, Genoa/IT
14:30–15:00	<b>Multiparametric imaging of prostate</b> J. Futterer, Nijmegen/NL
15:00–15:30	<b>Imaging and staging of ovarian cancer</b> A. Rockall, London/UK
15:30–15:50	Coffee break
15:50–18:00	<b>Workshops</b> (L. Derchi, J. Futterer, A. Rockall)
18:00	Certificate of attendance

### Host Organiser

**N. Elmas**  
Izmir/TR

### Venue

Pine Bay Hotel & Congress Center  
Camlimani Mevkii  
09400 Kuşadası  
Turkey

### Registration fee

Please note that registration for this programme is only possible in combination with the Balkan Congress of Radiology.

### Registration fees BCR 2018 + ESOR Visiting Professorship Programme

Specialists  
EUR 200 (before July 31, 2018)  
EUR 250 (after July 31, 2018)

Residents in training  
EUR 150 (before July 31, 2018)  
EUR 200 (after July 31, 2018)

Radiographers  
EUR 90 (before July 31, 2018)  
EUR 120 (after July 31, 2018)

For registration information please visit:  
[bcr2018.org](http://bcr2018.org)

For any questions related to registration,  
please contact: [info@bcr2018.org](mailto:info@bcr2018.org)

For further information  
on the programme and  
registration please visit

LEVEL II+III

## Learning Objectives

# BALKAN CONGRESS OF RADIOLOGY UROGENITAL RADIOLOGY

October 4, 2018  
Kuşadası/Turkey

### Imaging of haematuria

L. Derchi, Genoa/IT

- to discuss the definition of haematuria as well as the diagnostic approach to patients with this symptom
- to understand the role of the different imaging modalities in the evaluation of these patients
- to learn about the different techniques that can be used to perform CT urography

### Differential diagnosis of focal renal lesions

J. Futterer, Nijmegen/NL

- to learn how to interpret CT / MR imaging of focal renal masses
- to understand the role of advanced imaging techniques
- to learn about CT and MRI techniques

### Cervical cancer: initial detection and depiction of recurrence

A. Rockall, London/UK

- to be able to recognise the extent of cervical cancer on MRI and PET/CT in order to provide staging information
- to be able to identify the features of disease extent that could allow fertility preservation
- to understand the role of MRI and PET/CT in recurrent disease for planning salvage therapy

### Imaging testicular tumours

L. Derchi, Genoa/IT

- to know the imaging approach to patients with a testicular mass
- to understand when and how it is possible to differentiate between benign and malignant intra-testicular lesions
- to discuss the role of imaging as a guide to minimally-invasive, testicular-sparing surgery

### Multiparametric imaging of prostate

J. Futterer, Nijmegen/NL

- to understand how to perform multiparametric MRI
- to learn about Pi-RADS v2.0
- to learn how to interpret prostate MR images

### Imaging and staging of ovarian cancer

A. Rockall, London/UK

- to know the ultrasound appearances that differentiate benign from malignant masses using the IOTA simple rules
- to know the role and imaging sequences for characterisation of sonographically indeterminate adnexal masses
- to recognise the critical features that may determine selection of patients for surgery or chemotherapy in disseminate ovarian cancer on CT

*Education in  
partnership*

Please note that programmes are marked with a logo to indicate their classification according to the European Training Curriculum.

**LEVEL I** First three years of training

**LEVEL II** Fourth and fifth year of training  
(general radiologist standard)

**LEVEL III** Subspecialty training standard
